Experience

Freelance Web Developer | Remote

2022 - Present

- Wrote front-end logic and backend services using modern NextJS, React, and Node.js.
- Debugged rendering issues and refactored code for loading speed and cross-browser compatibility.
- Developed optimized back-end functionality and clean database structures.

Freelance UX/UI Designer | Remote

2020 - Present

- Designed and built web applications for international clients, maintaining design consistency from Figma files down to the final CSS code.
- Built a strong visual and UX foundation - wireframing, prototyping, interface systems, and user flow thinking.

Featured Projects

DN Tattoo

Designed and developed a website for the studio that aligns with the brand's style, tone, and value. Optimized the interface to be smooth and accesible.

Gaia Fresh

Built a vibrant, clean, e-commerce style juice product presentation interface built entirely around intuitive customer navigation and responsive layouts.

Aetheris

Built a modern and unique remote accomodation renting platform featuring a smooth experience and optimized user interface.
